Education

Netaji Subhas University of Technology (NSUT) 2023 – 2027
B.Tech in Computer Science Engineering *Delhi, India*

Experience

Zidio Development Sept 2026 – Present
(SDE - Intern) *(Remote)*

- Contributing to software development by implementing application features and improving existing functionality.
- Working on backend logic, API integration, and database operations as part of development tasks.
- Debugging issues and testing changes to ensure reliable application behaviour.

She Can Foundation Aug 2026 – Sept 2026
(Full Stack Engineer - Intern) *(Remote)*

- Managed and maintained the She Can Foundation website using React.js, Next.js, and Tailwind CSS.
- Worked on the donation feature, integrating payment gateway functionality to support online donations.
- Handled website updates, API integration, and bug fixes to maintain a smooth user experience.

TheAEK Apr. 2025 – May 2026
(Web Developer | theaek.com) *(Gurugram, India)*

- Developed and maintained a production website for 1+ year using Next.js, TypeScript, and Tailwind CSS, handling feature updates and performance optimization.
- Built responsive UI components and interactive pages, delivering a consistent experience across desktop and mobile devices.
- Improved SEO through optimized blog content and managed GitHub, Vercel deployment, and domain configuration, supporting 500+ monthly users.

Projects

MeshCall – Offline Peer-to-Peer Mesh Communication App | Github
(Kotlin, Android SDK, XML, Wi-Fi Direct, TCP Socket Programming, SQLite, GPS, Android Services)

- Built an offline peer-to-peer communication app supporting messaging, voice calls, file/photo sharing, and location sharing without internet.
- Implemented multi-hop mesh routing with dynamic route management, TTL, next-hop selection, and split-horizon routing.
- Developed real-time socket-based communication with peer discovery, local persistence, and reliable multi-device message forwarding.

Saksham AI – An AI-Powered Ed-Tech Platform | Github
(Next.js, React.js, TypeScript, Tailwind CSS, Gemini API, Firebase Authentication, YT Transcript, Framer Motion)

- Built an AI learning platform featuring AI Tutor, PDF Chat, Video-to-Notes, and personalized recommendations.
- Integrated Gemini API, Firebase Authentication, and YouTube Transcript API to power core AI and learning workflows.
- Designed a responsive, component-based interface with interactive UI and light/dark theme support.

Technical Skills

Languages: Java, Kotlin, Python, JavaScript, C++, TypeScript
Frontend: React.js, Next.js, HTML, CSS3, Tailwind CSS
Backend: Node.js, Express.js, Socket.IO, FastAPI, REST APIs, Firebase Authentication, Socket Communication
Databases: MongoDB, MySQL, PostgreSQL, SQLite
Tools: Git, GitHub, Docker, VS Code, Postman, Render, Vercel, npm, Anti Gravity, Android Studio

Leadership & Achievements

- **Ranked 9th among Top 160 Finalists** at **MUJ HACK X 4.0** – **International Hackathon**, competing with 636 Teams from across the GLOBE.
- **Secured Top 5 position at Devlympics Hackathon (NSUT)** – competing among 175 participating teams with an innovative technology solution
- **Secured 3rd Rank** – "Adman's Cut," an inter-college film advertisement-making competition at MOSAIC NSUT
- **Lead, IT Department** – Khelo India Para Games 2025, JLN Stadium Delhi
- **General Secretary** – Artificial Intelligence & Algorithm Society, NSUT
